

# Announcing the 10<sup>th</sup> Anniversary Yoram Kaufman Memorial Symposium

Inspired by the ground-breaking work of  
Yoram Kaufman and his colleagues.

What have we learned about aerosols over the past decade?  
What is our vision for future aerosol research?

Where: The NASA Goddard Space Flight Center  
Greenbelt, Maryland

When: June 21-23, 2016

For: Information, Registration, and Presentation Submissions:  
<http://aerocenter.gsfc.nasa.gov/ext/registration>

## Invited Speakers

**Paulo Artaxo – University of Sao Paulo, Brazil**

**Oleg Dubovik – University of Lille, France**

**Gerrit de Leeuw – Finnish Meteorological Institute, Finland**

**Graham Feingold – NOAA , Boulder, Colorado**

**Sonia Kreidenweis – Colorado State University, Fort Collins, Colorado**

**Jeff Reid – U.S. Naval Research Laboratory, Monterey, California**

**Daniel Rosenfeld – The Hebrew University of Jerusalem, Israel**

**Aaron van Donkelaar – Dalhousie University, Canada**

## Tentative Symposium Sessions:

- Remote sensing of aerosol, clouds, and Earth's climate
- Integrating aerosol observations into models
- Quantifying aerosol impacts on clouds, precipitation, and climate
- Creating tools, datasets, and infrastructure for aerosol research
- Emerging issues in aerosol science and community mobilization
- Developing future satellite missions for aerosol research
- Developing field campaigns and long-term networks
